WHAT PEOPLE SAY...

Although we receive hundreds of comments and emails, we believe this letter received via email Spring 2009 says it all...

"Dear Sharon, I am so pleased with your class. Four of us from Jacksonville, FL came to your course in NY back in April. When the last day was over we were all able to walk away and say to each other, 'even if we didn't pass the exam we felt as if we had grown tremendously in our nursing career just by attending your course'. You kept it interesting the WHOLE time, never did I look at the clock and say 'is it almost over?' because I loved to hear you talk and soak in the information. I kept thinking to myself during the class, 'man I wish I worked with or for her'! Since our return, before we got our test results, we have encouraged the rest of our unit to take the course... With much enthusiasm, I report to you and PEC that ALL of us passed the exam!

...With sincere gratitude." **CE, RNC Florida**

CONTINUING EDUCATION CREDITS

WHO SHOULD ATTEND?

- Labor & Delivery & LDRP Nurses
- Nurses New to OB
- Nurses Needing Cross-Training to L&D
- Nurses planning to take the Inpatient OB RNC Exam
- Nurses needing certification for Magnet Hospital status + maintaining CE credits

This course will update your clinical knowledge base in OB. Focusing on Labor & Delivery, you will review key clinical care issues from admission through delivery - with examples for decision making and best-case clinical choice selection!

If you are experienced, new to OB, or planning to take the RNC certification exam - this course is for you!

PROGRAM OBJECTIVES:

Following comprehensive lecture, discussion, A-V, presentation and case review, you will be able to:**

- Demonstrate knowledge of biological, physiological, psychological, and sociocultural factors that influence the pregnant family, developing fetus and impact care.
- Identify alterations in the biological, physiological, psychological, and sociocultural status of the mother, fetus and implications for the newborn.
- Identify patient's actual or potential problems/needs, utilizing information received from the patient, the family, appropriate records, and other health team members.
- Develop a comprehensive plan for individualized nursing care, including diagnostic, therapeutic, and patient education components.
- Evaluate interventions and modify the plan of care.
- Apply current standards of practice, research findings and ethical/legal principles in providing nursing care to the normal and high risk antepartal, intrapartal, and postpartal family.

****Taking the review course does not guarantee passing the exam.**
